**Fracknation: A Journalist's Search for the Fracking Truth: Extra Energy Edition {DVD}/Hard Boiled Films**

--2013 c

--DVD (30 mins)

--**Description** (from package cover) In Fracknation [Journalist Phelim] McAleer travels across the USA and Europe to uncover the science suppressed by environmental activists and ignored by much of the media. He talks with scientists and ordinary Americans in fracking areas and who tell him the truth behind the exaggerations and misrepresentations of anti-fracking activists.

**Bob Endlich's comments:** Josh Fox's "Gasland" attempts to make the gaseous evolution of methane work from water in Dimock, Pennsylvania a new hazard brought on by fracking, but in fact this natural process was shown to early settlers by Native Americans in exposures of the Marcellus Shale in upstate New York in Colonial Times, an example of alarmism created by Fox and other Climate Alarmists which group members should see by viewing this DVD.

**The Great Global Warming Swindle: A Documentary by Martin Durkin [DVD]/ Producer, Eliya Arman: WAGTV**

--2007 c

--DVD (158 mins)

--**Description:** (from package back) "Never before has there been such a devastatingly authoritative account of how the hysteria over global warming has parted company with reality. Martin Durkin's superbly professional film shows how the evidence is now overwhelming that the chief cause of climate change is not human activity, but changes in radiation from the sun." Christopher Broker, Sunday Telegraph.

**Bob Endlich's comments:** Dated, but highly recommended because it is filled with facts and nuances which might be missed the first or even the second viewing.

**Not Evil Just Wrong: The True Cost of Global Warming Hysteria [DVD]/**

--2008 c

--DVD (? mins)

**Producers:** Anne McElhinney, Phelim McAleer

**Description:** (from back package) "Not Evil Just Wrong" tells the story that the mainstream media has tried to hide: how the first major environmental victory, the banning of DDT led to a silent slaughter of millions of women and children in the developing world.

Filmmakers Ann McElhinney & Phelim McAleer reveal how Al Gore's new false doctrine about Gloval Warming is even more inaccurate and terrifying. His hysteria could kill American jobs during one of the worst recessions in living memory, send energy prices soaring and cripple economies around the world. Millions of families and their hopes for the future will be crushed.

**Bob Endlich's comments:** Especially noteworthy are the reactions of youngsters who after watching Al Gore's science fiction work are convinced that polar bears are at risk from human CO2, that it was human hunting, and area at further risk from human-caused acceleration of sea level rise, when the

truth is that seas were higher in Roman and Medieval Times, and sea level rates of rise have not changed since the time of the US Civil War.

**Unstoppable Solar Cycles: The Real Story of Greenland [DVD]/ The Idea Channel**

--year unknown

--DVD (10:39 mins)

--**Description:** This film tells a short story about how Greenland's climate has changed since the time the Vikings settled and lived there and how they vanished. The discussion touches on the various warming and cooling periods in the history of Europe as well as describing some of the effects of the oceans warming and cooling trends and solar activity all of which play very large roles in how the climate on Earth has been changing for thousands of years and will continue to do so.
