Carbon Dioxide reached critically low concentrations during the depths of the last Ice Age...

the Wisconsin Ice Age, as it is called in North America.

Such critically low levels bring carbon starvation to the plants we consume for our carbohydrates.

Such are the findings in the following publication from the Proceedings of the National Academies of Science.

Juniper trees were starving because there was insufficient carbon dioxide in the atmosphere.

Such are the findings by Joy Ward and her co-authors.

# Carbon starvation in glacial trees recovered from the La Brea tar pits, southern California

Joy K. Ward<sup>\*†‡</sup>, John M. Harris<sup>§</sup>, Thure E. Cerling<sup>¶||</sup>, Alex Wiedenhoeft<sup>¶</sup>, Michael J. Lott<sup>¶</sup>, Marla-Denise Dearing<sup>†</sup>, Joan B. Coltrane<sup>\*\*</sup>, and James R. Ehleringer<sup>†</sup>

Page Museum of La Brea Discoveries, 5801 Wilshire Boulevard, Los Angeles, CA 90036; <sup>||</sup>Department of Geology and Geophysics, University of Utah, 135 South 1460 East, Salt Lake City, UT 84112; <sup>§</sup>Forest Products Laboratory, U.S. Department of Agriculture Forest Service, One Gifford Pinchot Drive, Madison, WI 53726-2398; and <sup>\*\*</sup>Department of Anthropology, University of Utah, 270 South 1400 East, Salt Lake City, UT 84112

... Rancho La Brea tar pit fossil collection includes *Juniperus* (C3) wood specimens that 14C date between 7.7 and 55 thousand years(kyr) B.P., providing a constrained record of plant response for southern California during the last glacial period...

... Atmospheric CO<sub>2</sub> concentration ([CO<sub>2</sub>]) ranged between 180 and 220 PPM during glacial periods, rose to 280 PPM before the industrial period, and is currently approaching 380 PPM in the modern atmosphere...

... tree specimens... indicate.. that glacial trees were undergoing carbon starvation.

President Biden (and his climate Czar John Kerry) are acutely unaware that during the Last Glacial Maximum, as recently as 23,000 years ago, vegetation was carbon-dioxide starved.

If atmospheric carbon dioxide levels get too low, the plants will die.

All animal life, including ourselves, depend on plants for our carbohydrates to survive.

If the plants die, we will all die.

## **Biden Climate Envoy John Kerry: “We Need to Get Carbon Dioxide Out of the Atmosphere” (VIDEO)**

The President and his Climate Czar appear to want to commit suicide, and commit us to the same fate.

**No Thank You.**
