"Just one more thing."

If your electric car runs out of power on the interstate, do you walk to a charging station to get a bucket of electricity...?

To all the green people with green cars..
This is an electric charging station, powered by
a diesel motor. 🤔👤

This is a picture of a Electric car charging station that are popping up everywhere. Here's an interesting fact.... That 350kw generator uses 12 gallons of diesel fuel per hour, and it takes 3 hours to fully charge a car to get 200 miles. That's 36 GALLONS for 200 MILES!!! 5.6 mpg.

Proof you can't fix stupid...

**WELL, THERE IT IS. A GAS GENERATOR BEING
USED TO CHARGE THE DEAD BATTERY IN AN
ELECTRIC CAR. MY DAY IS COMPLETE.**

*A gas powered van, towing a
diesel generator, charging an
electric car.
The future is stupid.*

This is a CAT 994H. It burns 1800 gallons of fuel in a 12 hour shift. This machine is required to move 500,000 pounds of earth in order to get the minerals needed for ONE SINGLE Telsa car battery. In whose world does this type of math and green new deal make sense?

These men produce the
oil for my diesel truck

These children produce the
lithium for your electric car

This is a Lithium leach field. This is what your Electric Car batteries are made of. It is so neuro-toxic that a bird landing on this stuff dies in minutes. Take a guess what it does to your nervous system? Pat yourself on the back for saving the environment.

Doesn't become electric until it's
Charged. Without Fossil fuels it's
Worthless..
Sorry, reality....

For years they called it Global Warming. But they were proven over and over that no such thing is happening. Then they started calling it Climate Change. Again it is a hoax.

NOW SALLY, I'M JUST
LISTENING FOR ANY
SIGN OF CLIMATE CHANGE.
